#### **Inductive Bible Study Method Overview**

The inductive Bible study method consists of three main steps: Observation, Interpretation, and Application. This method helps you delve deeper into the Scriptures by asking questions of the text, understanding its context, and applying its truths to your life. Our goal in being good Bible students is to get to the core of the text where the Holy Spirit then has God's Word to bring back for us to meditate on throughout our day, then He offers to apply God's Word to our life. The Inductive Bible Study method is not a list of steps on how to be a better person or how, but it is a method for getting to know and understanding who God is better, then having this truth imprinted on our hearts and minds, for the Holy Spirit to then apply to our lives.
